

Designers

Cole Krant, Roman Lynch, Jaskarn Kahlon, Ian Pavlecic, Stefan Bobick, Maxwell Chang

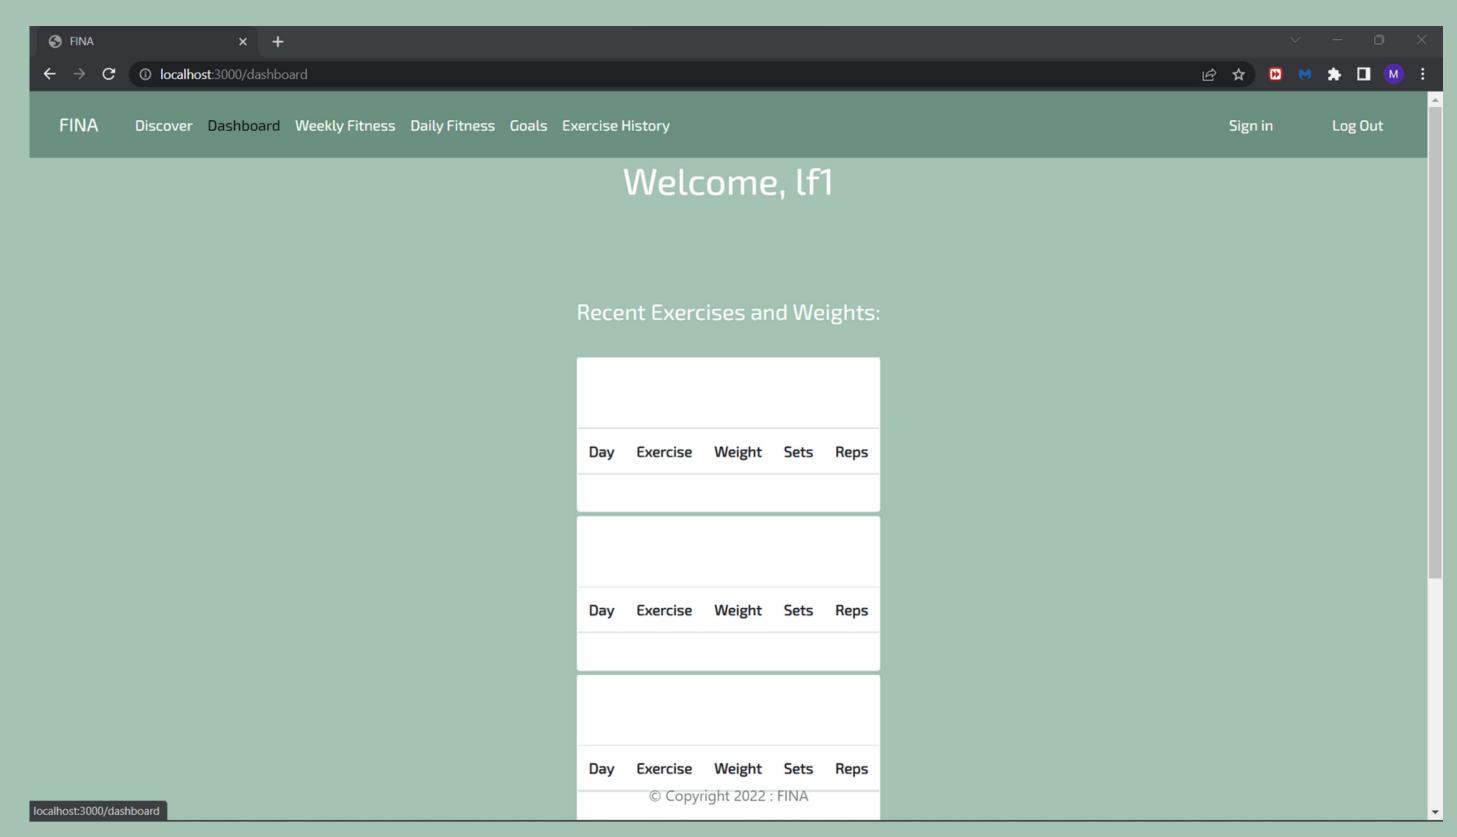

Overview

Routine building application that allows you to track fitness progression. Able to track bodyweight and exercise weight.

Simplistic design

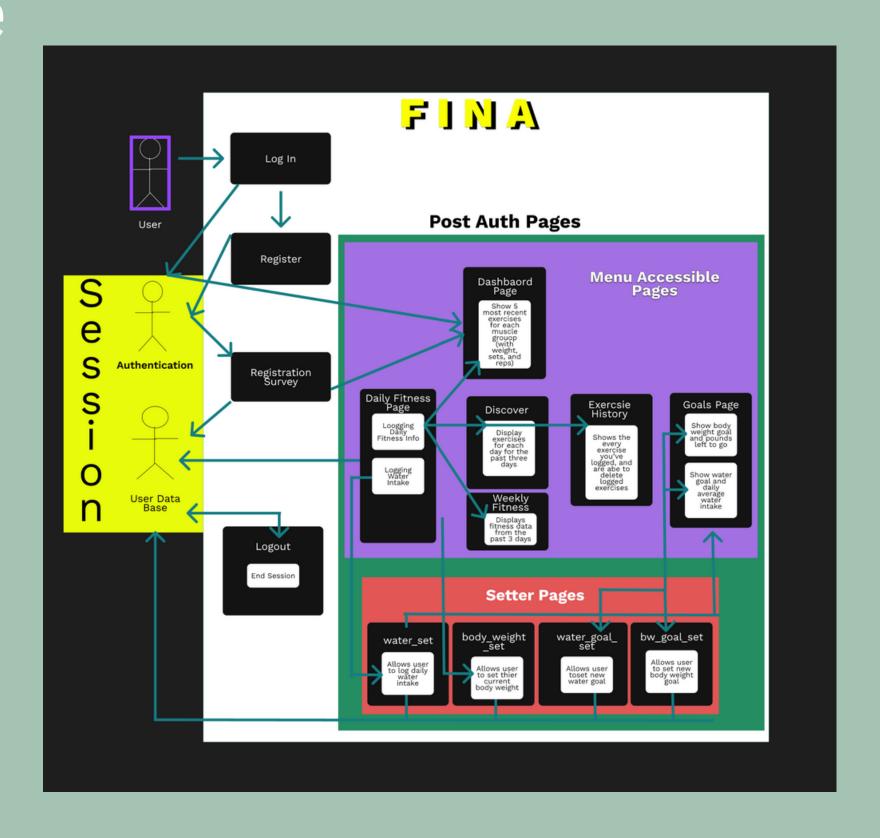

Tools used

- Project Tracker + VCS repository -> Github
- Database -> PostgreSQL
- IDE -> VS CODE
- UI Tools -> HTML/CSS/FIGMA
- EJS
- Application Server -> NodeJS
- Deployment environment -> Heroku

Architecture

Challenges

- Understanding how to link HTML/CSS/EJS/PostgresSQL for the backend
- Trouble with the scope of our features because of the time constraint
- Learning bootstrap documentation for front end
